

#DIGITOCRACY

Smart City Workshop

April 18th 2015 - Republic of San Marino
(Sala Montelupo, P.zza Filippo da Sterpeto 3, Domagnano)

Finalities:

As a follow up of the event "SMART CITY, a new model of democratic life", held in our country last September 30th 2014, we would deepen the inclusive policies applicability aimed to a life quality improvement, particularly, but not solely, through the most recent Telecommunication Information Technologies.

The primary target is to analyze the possibility to apply the Smart City development concept, to the small communities and not exclusively to the megalopolis.

Naturally the Republic of San Marino, due to its territorial and demographic characteristics, could be an extraordinary opportunity for practical test applications and a pilot-projects hub.

Programme

Demo Area during all the event in collaboration with ASI Associazione Sammarinese per l'Informatica (www.asi.sm), POLAB Laboratorio Elettromagnetico (www.polab.it) and MakeRN (www.makern.it)
